DETAILED ACTION

Drawings

1. The replacement drawing sheet has been approved.

Specification

- 2. The disclosure stands objected to because of the following informalities:
- a. On page 2 line 17 the number "14" does not make sense in that there is not reference number 14 in the drawings. The examiner recommends replacing the number "14" with the number --10 -- to correct this.
- b. On page 2 line 18 the number "16" does not makes sense in that there is no reference number 16 in the drawings. The examiner recommends deleting the number "16" to correct this.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 10/759,733 Page 3

Art Unit: 3711

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 4 is rejected under 35 U.S.C. 102(e) as being anticipated by Jacoby.

Jacoby discloses a hollow shaft (Ref. Nos. 12, 22) having external threads at one of said opposite ends (24, fig. 5a) and a putter head affixed to the other of the opposite ends (Fig. 1), a handle being threadedly affixed (48) to the external threads of the ends of the shaft (Figs. 5a, 5b), an elongated rod being telescopically inserted in a hollow shaft and being attached to the handle, the elongated rod being stowed within the hollow shaft when a handle means is threadedly affixed to the hollow shaft, and an elongated rod permitting a handle to freely extend for a predetermined distance from an end of a shaft upon threaded disengagement of the handle from the hollow shaft (Figs. 5a, 5b).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3711

6. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Parsick in view of Hall.

Parsick discloses a hollow shaft (42) having external threads at one of said opposite ends (44) and head affixed to the other of the opposite ends (Fig. 1), a handle being threadedly affixed (56) to the external threads of the end of the shaft, an elongated rod being telescopically inserted in a hollow shaft and being attached to the handle, the elongated rod being stowed within the hollow shaft when a handle means is threadedly affixed to the hollow shaft, and an elongated rod permitting a handle to freely extend for a predetermined distance from an end of a shaft upon threaded disengagement of the handle from the hollow shaft (Fig. 7).

Parsick lacks a putter head. Hall discloses a traveling golf club set including a putter (Col. 3, Lns. 40-45) having threaded couplings in order to disassemble a club to make it compact for traveling (Abstract). In view the patent of Hall it would have been obvious to modify the club of Parsick to include a putter head in order to form a set of clubs which are able to be disassembled for traveling.

Allowable Subject Matter

7. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. None of the prior art discloses or renders as obvious

Application/Control Number: 10/759,733 Page 5

Art Unit: 3711

a rod including an end portion for preventing separation of a rod from a hollow shaft in addition to the other elements of structure claimed.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen L. Blau whose telephone number is (571) 272-4406. The examiner can normally be reached on Mon - Fri 10:00 AM - 6:30 PM.

Application/Control Number: 10/759,733
